Pub/Sub Hackathon Brainstorming

What would make a pub/sub hackathon worth your time?

-
-
-
-

How much time can you commit to a pub/sub hackathon?

- 2-3 hours with a break in the middle
-
-
-

How can we make the most of virtual?

- Concise/short goal (need to get consensus first)(or small number)
 - Implementation target
 - E.g., Setup access point to repository
 - Can implement in multiple software stacks within the same hackathon
- Need time to get people up to speed
- Commitment-a-thon model
- Consider something more like a client tutorial using an existing service
-
